

BOOTLACE FERRULES

Aftec Bootlace ferrules ensure reliable electrical connectors when terminating conductors in screw clamp terminal blocks. Color coding of the insulation is according to the wire size and the country standard. Designed with seamless barrel to contain loose wire strands for separator terminations which are easy to use by stripping the wire and sliding on to the end wire and crimping suitable for limited space panel applications

Technical Data	
Material	Copper
Finish	Tin Plated
Insulation	Vinyl
